DRM Reception Output for RX-350 12kHz IF

Notes:
1. I am not responsible for any damage, direct or consequential, to your equipment due to performing these modifications.
2. Mount RCA jack at convenient location on back panel. Use suitable length of coaxial cable.
3. Capacitor is 0.1uF disc ceramic.
4. Note upside-down text at connector U7. This is how it should look when viewing the board from the front panel.
